SDS1800 - Career Tech Students in Discipline Settings

Discipline > Reports > Discipline > SDS1800 - Career Tech Students in Discipline Settings

The report lists students who are in Career & Technology courses and in a disciplinary setting. Students with disciplinary action codes of 01-15, 25-26, 50-61, and 99 are included. Students with other disciplinary action codes are excluded. The report displays students with the specified actual length of the disciplinary action and an equivalent PEIMS code for the action.

Parameter	Description		
Ending School Year (YYYY)	Type the four-digit ending school year.		

Campus ID (Blank for All)	<p>Filter</p> <p>When you want to view only certain data, you may find it useful to filter the report data. You can use specific criteria to retrieve only the data that you want. Not all reports allow this option.</p> <p>From the report window, click Sort/Filter to open the Sort/Filter window. By default, the Sort Criteria section is expanded. Click Filter Criteria to expand the Filter Criteria section.</p>  <p>If the report does not allow sorting, the Filter button is displayed instead of the Sort/Filter button, and sort criterion fields are not available.</p> <p>Click Add Criterion to add new filter criteria. A blank row is added to the grid.</p> <table border="1" data-bbox="609 871 1406 1567"> <tbody> <tr> <td>Column</td><td>Select a field by which to filter the data. The drop down lists the columns that appear on the report.</td></tr> <tr> <td>Operator</td><td>Select an operator.</td></tr> <tr> <td></td><td>= Equals ≠ Not equals > Greater than ≥ Greater than or equal to < Less than ≤ Less than or equal to</td></tr> <tr> <td>Value</td><td>Type the value by which you want to filter. For example, if you selected a date in the Column field, type a date to view only data for a specific date.</td></tr> <tr> <td colspan="2"> Note: When filtering report data by date, you must use the following formats: <ul style="list-style-type: none"> If the date is displayed in the MM/DD/YYYY format, the filter value must be in the YYYYMMDD format. If the date is displayed in the MM/YYYY format, the filter value must be in the YYMM format. If the date is displayed in the MM/YY format, the filter value must be in the YYMM format. </td></tr> <tr> <td>Add Criterion</td><td>Add another row. Select the logical connector (AND or OR) in the Logical field. Continue adding rows as needed. The Logical field does not appear until you click Add Criterion to add an additional row. <ul style="list-style-type: none"> Using the AND operator limits search results, because the program looks only for records that contain both criterion. Using the OR operator expands search results, because the program looks for records that contain either one criterion or the other, or both. </td></tr> <tr> <td>Delete Selected</td><td>Delete selected row. Select the row, and then click the button. The row is deleted from the filter criteria.</td></tr> </tbody> </table> <p>Click OK to apply the selected filter criteria to the report.</p> <p>Click Cancel to close the dialog box without applying a filter.</p> <p>NOTE: Some applications allow you to filter by specific data:</p> <p>In Test Scores, you can filter report data to include only students who are enrolled in special programs. When filtering report data for At Risk, PRS, and GT programs, you must select 1 (Yes) or 0 (No) in the Value field. For example, if you filter report data for the At Risk program by selecting Equals in the Operator field and Yes in the Value field, no data is displayed; however, if you select 1 in the Value field, the At Risk data is displayed.</p>	Column	Select a field by which to filter the data. The drop down lists the columns that appear on the report.	Operator	Select an operator.		= Equals ≠ Not equals > Greater than ≥ Greater than or equal to < Less than ≤ Less than or equal to	Value	Type the value by which you want to filter. For example, if you selected a date in the Column field, type a date to view only data for a specific date.	Note: When filtering report data by date, you must use the following formats: <ul style="list-style-type: none"> If the date is displayed in the MM/DD/YYYY format, the filter value must be in the YYYYMMDD format. If the date is displayed in the MM/YYYY format, the filter value must be in the YYMM format. If the date is displayed in the MM/YY format, the filter value must be in the YYMM format. 		Add Criterion	Add another row. Select the logical connector (AND or OR) in the Logical field. Continue adding rows as needed. The Logical field does not appear until you click Add Criterion to add an additional row. <ul style="list-style-type: none"> Using the AND operator limits search results, because the program looks only for records that contain both criterion. Using the OR operator expands search results, because the program looks for records that contain either one criterion or the other, or both. 	Delete Selected	Delete selected row. Select the row, and then click the button. The row is deleted from the filter criteria.
Column	Select a field by which to filter the data. The drop down lists the columns that appear on the report.														
Operator	Select an operator.														
	= Equals ≠ Not equals > Greater than ≥ Greater than or equal to < Less than ≤ Less than or equal to														
Value	Type the value by which you want to filter. For example, if you selected a date in the Column field, type a date to view only data for a specific date.														
Note: When filtering report data by date, you must use the following formats: <ul style="list-style-type: none"> If the date is displayed in the MM/DD/YYYY format, the filter value must be in the YYYYMMDD format. If the date is displayed in the MM/YYYY format, the filter value must be in the YYMM format. If the date is displayed in the MM/YY format, the filter value must be in the YYMM format. 															
Add Criterion	Add another row. Select the logical connector (AND or OR) in the Logical field. Continue adding rows as needed. The Logical field does not appear until you click Add Criterion to add an additional row. <ul style="list-style-type: none"> Using the AND operator limits search results, because the program looks only for records that contain both criterion. Using the OR operator expands search results, because the program looks for records that contain either one criterion or the other, or both. 														
Delete Selected	Delete selected row. Select the row, and then click the button. The row is deleted from the filter criteria.														

Click to restore the report to the original view, removing all sorting and filtering that has been applied.
