Grade Reporting > Reports > Grade Reporting Reports > Report Cards > SGR1155 - Current Cycle Averages From Grade Book

This report prints working cycle averages from TeacherPortal. The report is for the current year only.

- If a posted grade exists in ASCENDER, it is used to select the students and is displayed in the **Grade** column.
- If a posted grade does not exist in ASCENDER, the working cycle average in TeacherPortal is used to select the students and is displayed in the **Grade** column. If an override grade exists in TeacherPortal, it is used in place of the working cycle average; the working cycle average is displayed in the **Grade** column, and the override grade is displayed in the **Override Grade** column.
- If neither a posted grade exists in ASCENDER nor a working cycle average in TeacherPortal, the program checks if an override grade exists. If an override grade exists in TeacherPortal, it is used to select the students and is displayed in the **Override Grade** column. If the course has an auto grade, the auto grade is displayed in the **Grade** column.
- If neither a posted grade exists in ASCENDER nor a working cycle average nor an override grade in TeacherPortal, if the course has an auto grade, the auto grade is used to select the students and is displayed in the **Grade** column.
