SGP1000 - Student Personal Graduation Plan 1

SGP1000 - Student Personal Graduation Plan

Graduation Plan > Reports > SGP1000 - Student Personal Graduation Plan

This report allows you to view students personal graduation plans (PGPs). You can print reports to give to students and their parents/guardians to sign and return, at which point you can update the **PGP Acknowledgment** dates on [Maintenance > Student > Individual Maintenance > PGP](#).

■ If a student repeated a grade level, the ending of the first school year separated by “to” and the ending of the second school year displays next to the grade level (e.g., 13 to 14 instead of 13/14).

■ While the tables for Industry Credentials or Certification, Accelerated Learning Plans, Monitor Plans, and Parent Expectations allow up to 35 characters, fewer will be displayed for these fields on the report.

■ On the report, SE is Special Explanation (also known as special consideration). Codes

If the student takes two sections of the same course in semesters 1 and 2, and if the first course record has a code, the code is displayed. If the first course record is blank but the second course record has a code, that code is displayed. If neither course record has a code, the SE column is blank.

■ The Outstanding Performance on Assessment section displays data as follows:

● N/A is displayed if the student does not have outstanding performance on any assessment.

● ACT is displayed if the student has a composite score of 28 or greater on the ACT test.

● ACT PLAN is displayed if at least two of the four scores qualify for the college readiness benchmark score:

☐ English: 15 or greater ☐ Math: 19 or greater ☐ Reading: 18 or greater ☐ Science: 20 or greater

● PSAT is displayed if the student is commended for the PSAT score.

● SAT is displayed if the student has a combined math and reading score of 1250 on the old version of the SAT or at least 410 on the evidence-based reading section score and 520 on the math section score on the new version of the test.
