# Generic Programs

## Registration > Maintenance > Student Enrollment > Generic

This tab allows you to view and update information for students who participate in a generic program, such as dyslexic, tutoring, or 504. Generic programs also include any crisis events or short-term programs that arise in the district.

Before a student can be enrolled in a generic program, the program must be set up by the district on [Maintenance > District Profile > Generic Ent/Wd Program Codes](#). Then, the campus must select the program on [Maintenance > Campus Profile > Campus Generic Ent/Wd Program Codes](#) to make it available at the campus.

The Generic tab is not available until you retrieve a student on the [Student Enrollment](#) page. For a new student, you must enter and save all required data on [Demo1](#) before proceeding to this tab.

### Update data:

The student's existing generic program entry/withdrawal/reentry records are displayed. If the most recent row contains an exit date and withdrawal reason code, you can add a record.

Click **+Add** to add a record. A blank row is added to the grid.

<b>Campus</b>	The campus ID to which you logged on is displayed.
<b>Entry Date</b>	<p>To enroll a student in the program, type the date the student entered the program. Use the MMDDYYYY format. <b>Reason</b>	<p>If you are withdrawing the student from the program, click  to <a href="#">select the withdrawal reason</a>.</p> <p><b>CAUTION:</b> Although Code 33-Record Status Change is available from the list, it cannot be used for a local program withdrawal.</p>

<b>Other Spc Pgms</b>	Select the special program in which the student is participating.

Click **Save**.

If the student is changing programs, exit the student from the program he is changing from, then add a new row and enroll the student in the new generic program.

You can select multiple rows to be deleted at the same time.  2. Click <b>Save</b> . You are prompted to confirm that you want to delete the row. Click <b>Yes</b> to continue. Otherwise, click <b>No</b> .  You can save edits and delete records in the same step (i.e., the changes are all committed when the record is saved).
