For example, type a student ID to locate records referencing the student ID during a specified data range. Because of the wide range of data included in this column, it may be helpful to generate the report once without entering data in this field, and then review the data first. Upon reviewing the data contained in the Action Detail column of the report, you may identify search strings that will help you further limit the report data if needed, and then you can re-run the report with a value typed in the Action field.
