### Long-Term Substitute Teachers

Long-term substitute teachers can be granted access to use TeacherPortal on behalf of a teacher who is away for an extended period of time. When substitute teachers log in to TeacherPortal, they can select the teacher for whom they are substitute teaching. Then, the substitute teachers can proceed to use TeacherPortal as the teacher.

#### Prerequisites.

Before a long-term substitute teacher can access TeacherPortal, a substitute teacher record must already exist for him in TeacherPortal. These steps are covered in the TeacherPortal Administrator guide.

Create an ASCENDER TeacherPortal account.

A long-term substitute teacher must create a TeacherPortal account in order to log on to TeacherPortal. Substitute teachers will log on to TeacherPortal with their own accounts, rather than with the teacher's account.

□ From the Login page, click **Create Account**. The User Information page is displayed.

To exit without saving any changes, click **Return to Login**.

For assistance with these pages, view the online Help for each page.

As you update and post data in the database tables, be aware that the teacher's name will be associated with some actions, and the substitute teacher's name will be associated with other actions.

#### Reports > Seating Charts

This report prints a teacher's seating charts for all periods or one period. For each period, the seating chart is displayed followed by a list of students who are not assigned to seats. The seating chart lists the student name, gender, and ID.

If printed for all periods, each period prints on a separate page.

**NOTE:** If that field has been changed, and the seating charts have not been re-saved on Settings > Manage Charts since the setting was changed, a warning message is displayed when the report is generated indicating that the reports will not be accurate until the Manage Seating Charts page has been re-saved. You must review the seating chart for each period on the Manage Seating Charts page, make any necessary changes, and then re-save each chart.
