This page allows you to set the school year for the application and the as-of date for the fall extracts. The school year is used by all maintenance pages for looking up data for all edit tables and drop-down lists. The school year is also used to look up codes in the edit tables for reports (where applicable). You can also record the generic program codes used to track participation in various programs.

Update data:

Submission Year	Type the ending year of the school year for which you will be submitting data. The submission year is edited to ensure a valid year is entered and that code table data is loaded for the year specified. If you change the date, all district and campus data is deleted except for the District ID and District Name fields on Maintenance > Organization > County District , and the Campus and Campus Name fields on Maintenance > Organization > Campus ID .
As-of Date	Type the fall as-of date provided by the TEA. Or, click the field to select the date from a calendar. The as-of date is edited to ensure a valid date is entered. This date is used in the fall staff and fall student extracts.
School Start Window (SSW) Date	Type the school-start window date set by the TEA for the current school year. Or, click the field to select the date from a calendar.

The following fields allow you to specify the codes used to track students enrolled in various generic programs. These codes must already exist in the district generic programs table, which is maintained in ASCENDER Registration on Maintenance > District Profile > Generic Ent/Wd Program Codes.
