TSDS PEIMS Extended Year Submission

The State Reporting application provides programs to extract the appropriate data for each collection from the Business and Student systems. These programs are reviewed and modified annually, per the published Texas Web-Enabled Data Standards (TWEDS), to ensure that the data extracted to the district database is as accurate as possible. The extracts provide many of the edits as defined in the TWEDS.

The PEIMS extended submission (Submission 4) includes program data for instructional activities between school years for special education, extended year services (ESY), student data, student flexible attendance for credit recovery, and dual-credit course completion.

The Extended Year submission is due August 29, 2024.

IMPORTANT: Each LEA will have unique situations. Some of the dates, images, and examples provided in this document are for informational and instructional purposes only and may not completely represent your LEA's process.

- Verify that all roles and users are correct in ASCENDER Security Administration.
- All staff responsible for extracting data must coordinate activities with each other. This is especially important when deleting data from the frozen file, extracting data, and manually entering data.
- You can begin working on TSDS extended data at any time; however, the school year must be over before you can extract TSDS Extended data.
- You can extract TSDS extended data whether or not Annual Student Data Rollover (ASDR) has been run; there is an option when extracting extended year data to select current year or last year.

Terminology:

- **Interchange:** A file that contains data in the correct format to be transferred to TEA.
- **Complex Type:** A grouping of Elements within an Interchange.
- **Element:** A specific unit of data that must be reported to the TEA.

IMPORTANT:

Be sure all TSDS activities are coordinated so that one group's data is not inadvertently overwritten.

Organization data is manually updated and should not be deleted.

Extract or Import Data

- [Complete the extended extract.](#)

If you do not extract your data, skip this section.

[State Reporting](#) > [Extracts](#) > [Extended](#)

If you are running the Extended School Year (ESY) services extract, all existing ESY data in State Reporting is deleted. If you are running the Bilingual/ESL Summer School Program extract, all bilingual/ESL summer school indicators in State Reporting are set to 0. After the extracts have run, all demographic records in State Reporting for students who are not coded ESY or bilingual/ESL summer school are deleted.

- Any combination of data can be extracted. Each option displays a separate error report.
- The ESY extract sets the Bilingual/ESL indicators on the State Reporting demographic record if the options are set on the student record.

If you are running the Additional Days School Year Program (ADSY) extract, when selected, this option will create the student demographic, basic attendance, and special education attendance for students participating in the Additional Days School Year Program. It will also create the staff demographic and responsibility records for a teacher with role ID 087 and 047 teaching a designed Additional Days School Year course with at least one enrolled student who is participating in the Additional Days School Year Program.

☐ Correct data and rerun the extract until there are no FATAL errors.

- [Or, import data from an external file.](#)

[State Reporting > Utilities > Import External File](#)

Some districts may update data in TSDS tables from a text flat file created outside ASCENDER where each row in the file corresponds to a TSDS record. The only TSDS record types available for importing for Submission 4 are:

- Organization-District (010)
- Organization-Campus (020)

All other records are skipped.

See online Help for file layout.

File:

File Click **Browse** to select the file to import.

The first letter of the filename indicates the submission period and must be one the following in order to be imported:

F (fall)
M (mid-year)
S (summer)
E (extended)

Once a file has been selected the **Import** button is enabled.

☐ Click **Import**.

When the import is complete, results are displayed, including counts of errors, records read, records skipped, and records by type.

Valid records are imported. Records marked with errors are not imported.

Correct any errors, and then run the [Delete Tables utility](#) to clear out the imported data; otherwise duplicate record errors will occur when you attempt to import a second time for the valid records that were imported originally.

Print Report

Click to [print the PEIMS Import External File Report](#).

Review the report using the following buttons:

Click  to go to the first page of the report.

Click  to go back one page.

Click  to go forward one page.

Click  to go to the last page of the report.

The report can be viewed and saved in various file formats.

Click  to save and print the report in PDF format.

Click  to save and print the report in CSV format. (This option is not available for all reports.) When a report is exported to the CSV format, the report headers may not be included.

Click  to close the report window. Some reports may have a **Close Report**, **Exit**, or **Cancel** button instead.

Records that resulted in an error are listed. The line number in the file corresponding to the record that caused an error is displayed in the first column, and the record itself is displayed in the second column. A summary of the import is printed on the last page of the report.
