- [Staff extract.](#)

If you will be manually entering the staff responsibility data on the ASCENDER State Reporting maintenance pages, skip the following steps.

Import Staff Data (for Student-only Districts)

Districts that do not use ASCENDER Business applications can import basic staff demographic data to be used for the TSDS Staff Interchange records (i.e., to join the unique staff ID with a teacher/staff record). The import adds “non-employee” data to HR that will be read by the extract, along with data from ASCENDER Grade Reporting. **This utility must be run before running the staff extract.**

[State Reporting > Utilities > Import Staff File](#)

[File layout](#)

The utility accepts data from a comma-delimited text or CSV file (e.g., provided by a third-party business application vendor) and inserts the records into HR tables which allows you to maintain this data in the ASCENDER TSDS application.

The values must be inserted in this order:

Before Extracting Staff Data:

Verify and correct data in the master schedule as described in the **Verify Master Schedule Data** section of this guide.

Ensure that all inactive employees have a termination date entered (**Termination - Date** and **Reason** fields on **Human Resources > Maintenance > Staff Job/Pay Data > Employment Info**). If the **Reason** field is blank, the employee is not extracted.

Student workers who do not meet the eligibility requirements for TRS should be excluded from PEIMS staff reporting. Those who are eligible will be reported as staff AND as student, but will retain their status as a student in the Unique ID Database.

NOTE: It is best practice at the district level that for a student worker, the district should use the information from their birth certificate and not their SS card (sometimes it is different). If the district follows this practice with student workers, they should not get a discrepancy. All other staff use their SS card to determine name.

Ensure that all Type 3 (hourly) employees have an estimated annual salary (**Payroll > Maintenance > Staff Job/Pay Data > Job Info**) and distribution (**Payroll > Maintenance > Staff Job/Pay Data > Distribution**).

The fall Staff Extract page will extract data for the *StaffAssociationExtension* interchange, including staff demographic, payroll accounting, and responsibility data from the master schedule and the Personnel application. You can extract subsets of data, multiple times. You can extract from Personnel only, master schedule only, or both at the same time.

Districts with contracted instructional staff serving as classroom teachers (i.e., PEIMS Type 3) will also enter data on **ASCENDER District Administration > Maintenance > Non-Employee**.

NOTE:

When extracting from the master schedule, class ID is set to the course number (four to eight digits) + two-digit section number + one-digit semester number + padding with zeros.

- Class ID is only repeated if more than one instructor is assigned to the same course-section (e.g., assistant or support teacher).
- If **Class Type** is blank in the district master schedule, the extract will use 01 - Regular.

Monthly minutes are determined as follows:

- If **Time Begin** and **Time End** on **Grade Reporting > Maintenance > Master Schedule > Campus Schedule > Section** contain values, monthly minutes are calculated from the begin and end times, days of week, and weeks of month code.
- If **Time Begin** and **Time End** are blank, monthly minutes are set to the value in the *Campus/Service ID* crosswalk table.
- If **Time Begin** and **Time End** are blank and the *Campus/Service ID* crosswalk table does not exist, the monthly minutes are set to the value in the *Campus/Period* crosswalk table.
- If **Time Begin** and **Time End** are blank and neither the *Campus/Service ID* crosswalk table nor the *Campus/Period* crosswalk table exist, an error message is displayed.
- See the Verify Master Schedule Data section of this guide for more information.

If a district has responsibility data in both HR and the master schedule, and the options to extract from both sources are selected, the following occurs:

- Existing staff responsibility records in TSDS are deleted (unless you selected the option to update class counts only).

- Staff responsibility records are extracted from the master schedule.
- Staff responsibility records are extracted from Human Resources. Only new records are added. If a record with the same key already exists in TSDS, the record from HR is not written, an error is displayed the summary report for the Human Resources record.
