## **TEA Census Block - Import**

**Import Data:** 

State Reporting > Utilities > TEA Census Block > Import Census Block

**IMPORTANT:** This utility must be run in the Firefox browser. This utility allows you to import a .csv file of Census Block GEO ID to assign the Census Block data to eligible students. This automatically populates the **Student Census Block** field on State Reporting > Maintenance > Fall > Student > Demo.

•		
$\square$ Save the file as a .csv file with a unique name (e.g., ASCENDERISD_CENSUS_BLOCK.csv).		
☐ Click <b>Browse</b> to locate and select the .csv file provided by the TEA.		
□ Click Import.		
Records are created in the census block table that contain the student's social security number and GEO ID.		
☐ Click <b>Print Report</b> to view the file and any errors. The number of records updated or inserted in the census block table is also included.		
NOTE: This process also applies if you changed the address for one or several students, putting them into a different block:  Add the student(s) to TEA spreadsheet and calculate.  Created a new TEA .csv with only that one student (or several students).  Import the file.
