Import Census Block	1
----------------------------------	----------

Import Census Block

State Reporting > Utilities > TEA Census Block > Import Census Block

IMPORTANT: This utility must be run in the Firefox browser. This utility allows you to import a .csv file of Census Block GEO ID to assign the Census Block data to eligible students. This automatically populates the **Student Census Block** field on [State Reporting > Maintenance > Fall > Student > Demo](#).

Import Data:

☐ Save the file as a .csv file with a unique name (e.g., ASCENDERISD_CENSUS_BLOCK.csv).

☐ Click **Browse** to locate and select the .csv file provided by the TEA.

☐ Click **Import**.

Records are created in the census block table that contain the student's social security number and GEO ID.

☐ Click **Print Report** to view the file and any errors. The number of records updated or inserted in the census block table is also included.

NOTE:

This process also applies if you changed the address for one or several students, putting them into a different block:

☐ Add the student(s) to TEA spreadsheet and calculate.

☐ Created a new TEA .csv with only that one student (or several students).

☐ [Import](#) the file.
